DETAILED ACTION

Specification

1. The abstract of the disclosure is objected to because the phrase "There is provided" in line 1 should be deleted. Correction is required. See MPEP § 608.01(b).

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or
REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.)
- (f) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (l) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

2. The disclosure is objected to because of the following informalities: in paragraph 4, line 3, the EP Patent number should read --738 551--; in paragraph 37, lines 7-8, the sentence "The mandrel (72) comprises the head forming in component of the rivet (14) as is known in the art" is not clear; in paragraph 41, line 2, --of should be inserted after "primary side".

Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitations "the setting operation ", "the load" and "the time difference" in lines 1, 3 and 8 respectively. There is insufficient antecedent basis for these limitations in the claim.

Claims 10 and 11 recite the limitation "said selected fastener type" in line 2 of each claim. There is insufficient antecedent basis for this limitation in the claims.

Claim 12 recites the limitation "said multiple setting operations" in line 1. There is insufficient antecedent basis for this limitation in the claim.

Claim 14 recites the limitation "the load" and "the set fastener" in lines 3 and 10 respectively. There is insufficient antecedent basis for these limitations in the claim.

Allowable Subject Matter

5. Claims 1-20 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
6. The following is a statement of reasons for the indication of allowable subject matter: the prior art does not teach a blind rivet system or a method of monitoring the setting operation for a blind fastener wherein a time difference between a mandrel entry time and a setting time is compared against a predetermined reference time difference associated with a fastener to determine whether a set fastener complies with a predetermined acceptable setting procedure, these in combination with the rest of the limitations in the claims.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
